DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4, 11-13, 26, 29, and 36 are rejected under 35 U.S.C. 102(e) as being anticipated by Hsu (6,804,861). Hsu shows a first base (6), a second base (4), a sleeve (42) having a stopper (inherently, it requires a stopper element to attach the sleeve to the second base 4. Note that sleeve 42 and second base 4 rotate synchronously), a buffering element (45), and a retaining means (46). Hsu also shows a rotation-limiting ring (5) between the first and second bases.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 3, 6, 27, 28 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hsu (6,804,861).

Hsu does not show the sleeve having a flat or slot to transmit rotation. It would have been an obvious matter of design choice to form a flat or slot in the sleeve of Hsu to transmit rotation to the second base, since applicant has not disclosed that using a flat or slot solves any other stated problem and it appears that using any structure to fixedly attach the sleeve to the second base for rotation transmission would perform equally well. *In re Kuhle*, 188 USPQ 7.

As to the specific buffering element of claim 6, it would have been an obvious matter of design choice to make the buffering element with discs or whatever form or shape was desired or expedient. A change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47.

Allowable Subject Matter

5. Claims 14-25 are allowed.
6. Claims 5, 8-10, 30 and 32-35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed Jun. 7, 2005 have been fully considered but they are not persuasive. Applicant's primary argument is based on that the applied references do

not disclose "a rotation-limiting ring". In fact, Hsu '861 clearly shows a rotation-limiting ring (5) that performs the function as claimed.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
